Serving Recommendations	This sparkling white wine should be consumed young in order to enjoy all of its aromatic potential.

History

The “Say it Is Bubbles” comes up from the need of creating a range of light and very fresh sparkling wines. The name of this wine is the adoption of very popular expression (slang) of our region, that is used at the start of a conversation and commonly associated with the start of a rumor. Combined with a very young, and light image is the perfect wine to share with friends during a meal, or at summer evenings in a relaxed environment.

Wine Making

Started with pre-fermentative light maceration followed by the alcoholic fermentation in stainless steel vats with controlled temperature of 18° Celsius for about 15 days. Two days before bottling, the wine is transferred to an isobarometric stainless steel vat where the Carbon Dioxide is added. CO2 is widely used in the food processing. It puts the fizz into wine, beer, cider, and soft drinks. It is intended that the wine reaches a gas percentage of 1 bar.

Tasting Notes

It presents a clear yellow citrus colour. On the nose it has some slightly intense aromatic notes of fruit and flowers. On the mouth assumes a balanced structure and acidity. Pleasant aftertaste.
